

Attachment to Oct. 2, 1998 I&E of Surface Management notice (serial no. UTU 66357) --
Photographs (enclosed with attachment in a page size plastic enclosure). The reverse of photos and panorama are marked with the serial number, date, and numbering as below. Descriptions are as follows

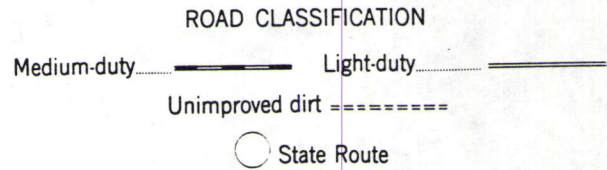

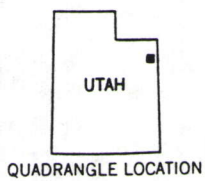

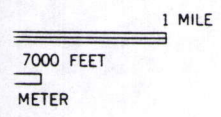

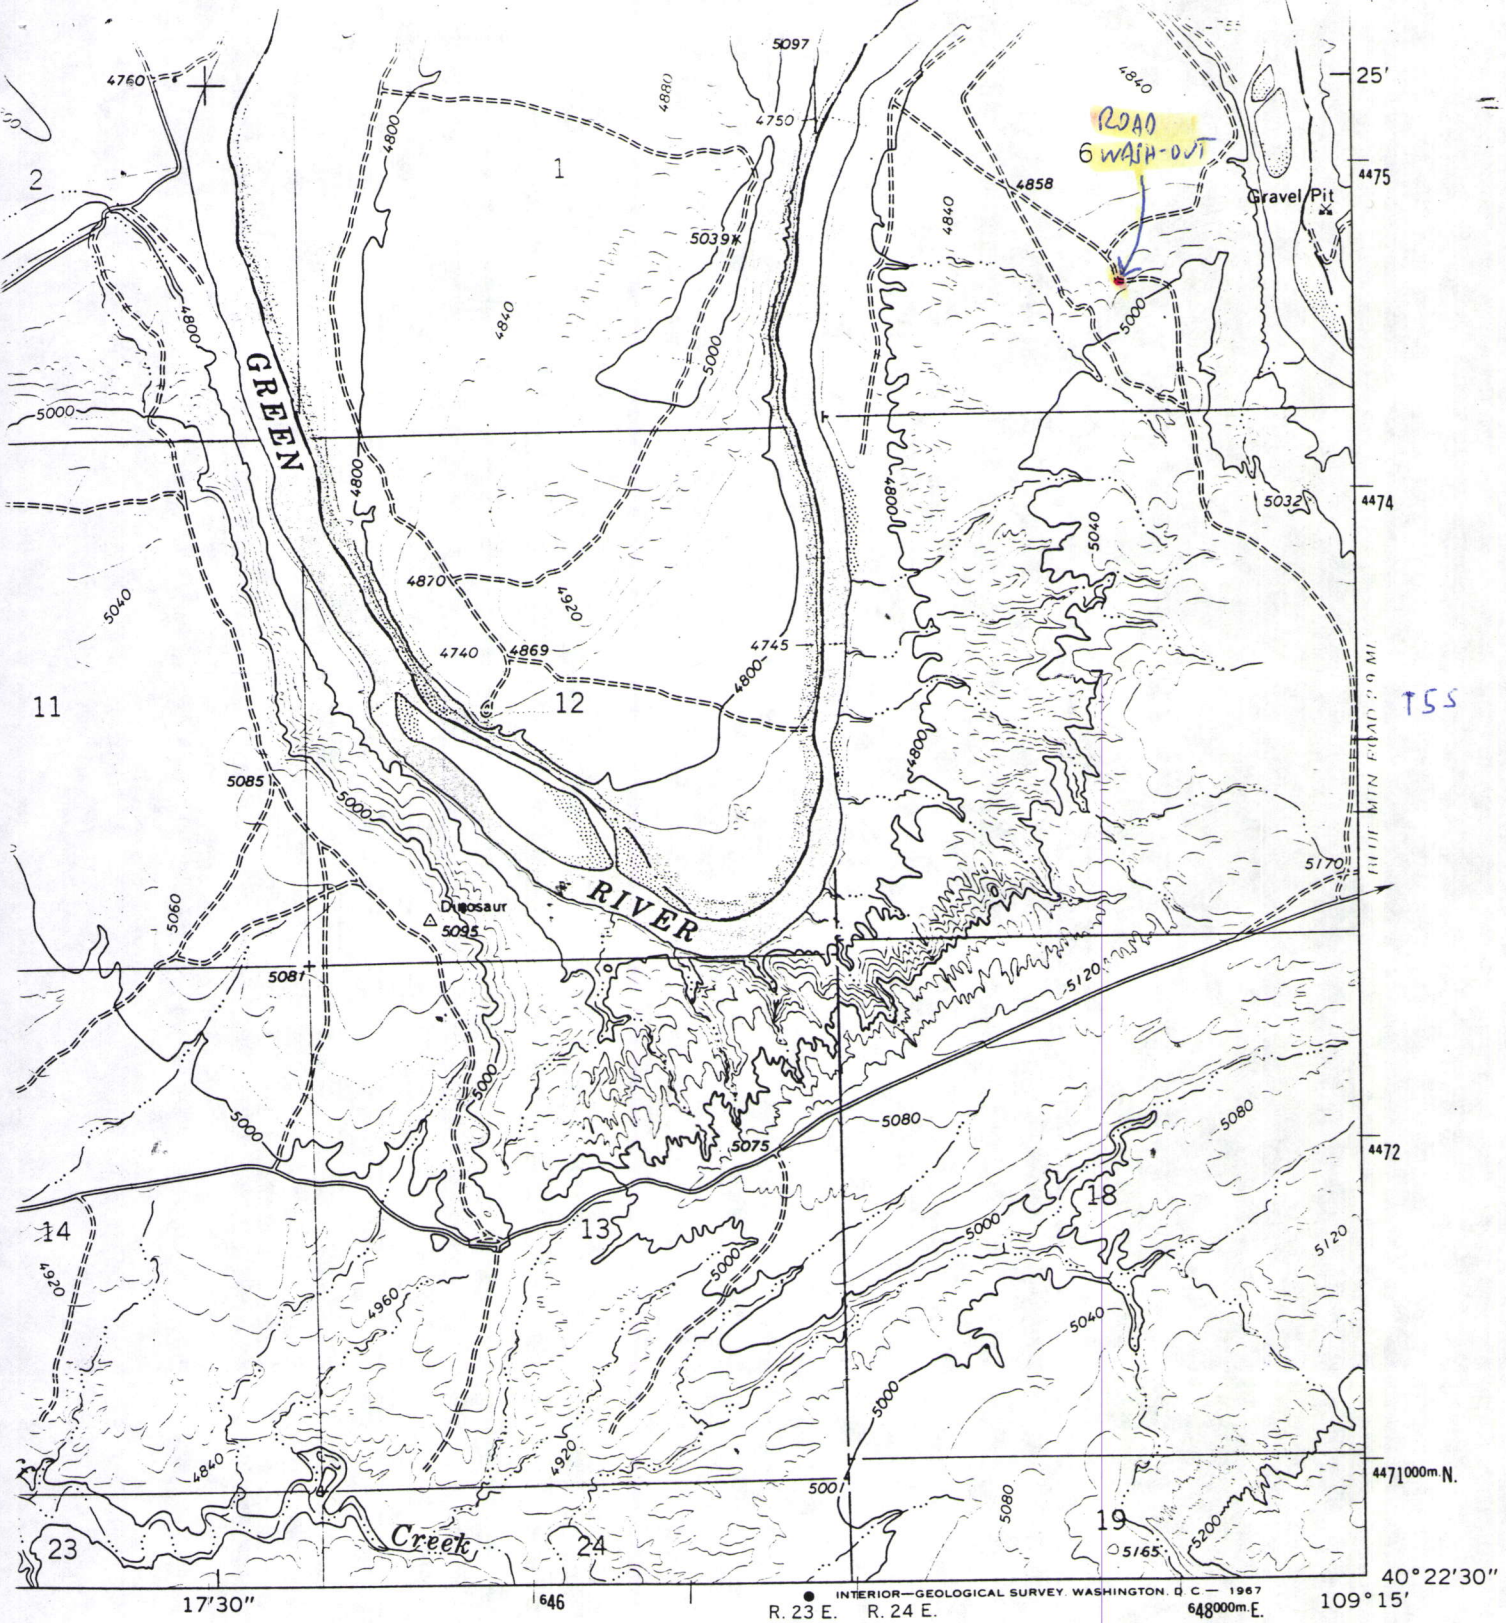

Photo 1 - (wide angle) view to west (from eastern-most end of project area) showing natural revegetation in center to left (area stripped of top soil, at right - red arrow). Misl. equipment is about (green arrow at left and blue arrow at right). Master power switch is at base of transformer pole at left (purple arrow). Closer view of equipment (brown arrows at center) are shown in photos 2 and 3.

Photo 2 - (wide angle) view to NNE of inactive placer processing equipment and facilities: 1 - settling pond, 2 - wooden structure housed fine gold recovery equipment (note doors are open), 3 - electrical panel and knudson bowl piece of equipment, 4 - wet screen, and 5 - grizzly screen for initial screening-out of oversized material, moved into stockpile 6). Note gap of equipment between items 3 and 4. Pipe rack type piece of equipment is at far left.

Photo 3 - (wide angle) view to north of some of same items in photo 2 with addition of wet loading hopper (black arrow at right). Finer material that fell through grizzly screen (item 5 in photo 2) would be loaded into this hopper which has water spray bars inside.

Photo 4 - view to west of wash-out in access road (at left, green arrow). Vehicular traffic has been driving around wash-out at right (red arrow).
